

DIGITAL WATER BATH

Overview: -

One of the essential equipment of laboratory used to incubate samples under water at constant temperature (hot or cold). It comes in various design configurations, sizes and dimensions. Water baths are used in clinical and microbiology laboratories, universities, environmental research and even food technology; the applications include warming reagents, sample thawing, corrosion tests and bacteriological examinations etc.

Standard Features:

- Fitted with digital temperature controller
- Excellent temperature accuracy & uniformity

High grade stainless steel interior

Powder coated exterior cabinet OR epoxy coated SS304

High density glass wool insulation

Variety of optional accessories available

Large models are having internal circulation system with inbuilt corrosion resistant pump.

External circulation available on demand

Various customized options available
