

IN SUPPORT OF INNOVATIVE RESEARCH

## ICE FLAKING MACHINE

### Features:

- Fully Automatic microprocessor control
- Compact Design and low maintenance
- Stainless Steel construction
- Continuous Ice Flakes Output
- CFC free compressor
- Noiseless operation
- Overload protection
- Low water level detection
- Wheels for easy mobility

IN SUPPORT OF INNOVATIVE RESEARCH

## Specifications:

| MODEL                                 | RDBL-IF-30                     | RDBL-IF-50  | RDBL-IF-85  | RDBL-IF-100 |  |  |
|---------------------------------------|--------------------------------|-------------|-------------|-------------|--|--|
| Capacity Of Ice Flake(Kg<br>Pr24 Hrs) | 30kg                           | 50kg        | 85kg        | 100kg       |  |  |
| Storage Bin                           | <b>Abs Plastic</b>             |             |             |             |  |  |
| Storage Capacity                      | 10kg                           | 15kg        | 25kg        |             |  |  |
| Cooling Method                        | Air                            |             |             |             |  |  |
| Working Temperature                   | Room temp should be below 30°C |             |             |             |  |  |
| Construction                          | Stainless steel                |             |             |             |  |  |
| Noise Level                           | ≤52dB                          |             |             |             |  |  |
| Water Supply                          | ¾ inch BSP                     |             |             |             |  |  |
| Refrigerant                           | R134A                          |             |             |             |  |  |
| Input Power                           | 180w                           | 280w        | 420w        |             |  |  |
| Dimension(Mm)                         | 30000x493x547                  | 380x543x722 | 549x611x833 |             |  |  |
| Power Supply                          | 220v /50HZ                     |             |             |             |  |  |
| Gross Weight                          | 36kg                           | 45kg        | 62kg        | 64kg        |  |  |

## Applications:

**Research Institute, Hospitals, Laboratories, Biotechnology & Universities.**
